

Analysis #1

Question:

Give me the average employee count each year as a line chart

Visualization:

Summary:

FINAL ANSWER: The requested line chart has been generated. It displays the average employee count for each year, showing the following trends:

- **2022**: The average number of employees was approximately 178.
- **2023**: This decreased to about 151.
- **2024**: There was an increase, bringing the average employee count to roughly 186.

This visualization helps you observe the fluctuations in average employee counts across these years, suggesting potential trends or areas for further analysis on what might have influenced these changes.
